

To whom it may concern,

RoHS & REACH Compliance Declaration

We hereby declare that the raw materials used to manufacture DYKA Group products are compliant with all requirements and exemptions set by the European RoHS 2.0 Directive **2011/65/EU** & the European Delegated Directive **(EU) 2015/863**.

We hereby also declare that the raw materials used to manufacture DYKA Group products are compliant with the related requirements of European Union Regulation **(EC) 1907/2006** concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

With regard to the duty of **Article 33 of the REACH Regulation** to communicate information on substances of very high concern (SVHCs) in articles, we declare that our products except those referenced to in note **1** do not contain SVHCs from the REACH Candidate List. As a downstream user we require our suppliers to comply with the RoHS and REACH Directives and to notify us about any supplied products containing restricted hazardous substances and SVHCs.

Our team is constantly monitoring the development and modifications in the RoHS and REACH legislations to ensure continued compliance. Specific questions on these matters can be posed to your sales contact person or to reach@dyka.nl.

Best regards,

DYKA Group

Note 1:

Our PVC-U products incorporating PVC recyclates that are sourced from external suppliers could contain traces of lead. Any traces of lead are embedded in the polymer matrix and under normal conditions are not released during the service life of the product. Until approximately ten years ago, lead stabilizers were used by manufacturers in the European Union for the stabilization of PVC products. Since then, alternative stabilizers have been developed. DYKA has been exclusively using these alternative, lead-free stabilizers in its PVC piping systems since 2012. In accordance with the EU Waste Framework Directive, DYKA has registered the articles containing externally sourced PVC recyclates possibly containing lead in the SCIP database of the European Chemicals Agency (ECHA) to ensure that this information is available at all times to waste processors and product users. Customers that purchase these products are provided with corresponding SCIP numbers by way of the order confirmation.

Note 2:

Under the structure of the REACH regulation, DYKA Group is a manufacturer of "ARTICLES". We do not manufacture "substances" or "preparations" and our articles do not involve the "intentional release of substances".
